

# Powerlessness and the Addicted Family

with Otis Peeples, MS, LPC, CADDC, S-PSB, CSAT  
(candidate)

Addiction does not discriminate. Its devastation can affect the entire family. Are you having difficulty trying to help the addicted member move forward in their recovery?

Powerlessness is a failed attempt to control a situation or person. It's important to realize it's impossible to win a power struggle with an addict. Admitting you are powerless is a powerful step. In this 2-hour workshop we will look at Powerlessness and its effects on the entire family. We will review strategies and tools that every family member can use on the Path to Recovery.
